To cure Consumption we must stop usually heal the worn-out organs of the system that disease has consumed.

We must treat every organ in the system, for the Lungs are not the only organs affected. It affects the Liver, the Heart, the Kidneys, Bladder, and Pancreas; and, in fact, every organ in the body is more or less tainted with decomposition and decay.

THE LUNGS

ARE THE BREATHING APPARATUS OF THE SYSTEM.

When the Lungs are in a state of decay they are unable to receive or smit the necessary amount of air requisite to sustain life. The greater the atmospheric pressure upon the air-ceils, the more painful, irritable, and suffocating is the weight upon the lungs.

THE GLANDS

DR. JOHNSTON That he has discovered the most certain, speedy an cious plan of treating SECRET DISEASES that has ever yet been presented to the world. By his plan, founded on observation made in the Hospitals of Europe

and America, he will insure

A CURE IN TWO DAYS,

A CURE IN TWO DAYS,

OR No CHARGE.

No Mercury or Nauscous Drugs used.

Weakness, Loss of Organic Powers, Pains in the Loins,
Disease of the Kidneys, Affections of the Head, Throat, Nose
and Skin, Constitutional Debility, and all those horris affections arising from a Certain Secret Habit of Youth, that soltiary practice, more fatal to its victims than the song of the
Syrons to the mariners of Ulysses—blighting their most
brilliant hopes or anticipations, rendering Marriage, etc.,
impossible.

A CURE WARRANTED, OR NO CHARGE. A CURE WARRANTED, OR NO CHARGE.

Young Men especially, who have become the victims of Solitary Vice, that dreadful and destructive habit which annually sweeps to an untimely grave thousands of young men of the most exalted talents and brilliant intellect, who might otherwise have entranced listening Senates with the thunders of eloquence, or waked to cestacy the living lyre, may call with full confidence.

MARRIAGE.

may call with full connence.

MARRIAGE.

Married persons, or those contemplating marriage, being aware of physical weakness, should immediately consuit Dr. J., and be restored to perfect health.

Office, No. 7 South Frederick street, Baltimore, Maryland, on the left hand side, going from Baltimore street, seven doors from the corner. Be particular in observing the name and number, or you will mistake the place.

DR. JOHNSTON,
Member of the Royal College of Surgeons, London, Graduate from one of the most eminent Colleges of the United States, and the greater part of whose life has been spent in the Hospitals of London, Paris, Philadelphia, and elsewhere, has effected some of the most astonishing cures that were ever known. Many troubled with ringing in the ears and head when asleep, great nervousness, being alarmed at sudden sounds, and bashfulness, with frequent blushing, attended sometimes with derangement of mind, were cured immediately.

TAKE PARTICULAR NOTICE.

Dr. J. addresses all those who have injured themselves by private and improper indulgences, that secret and solitary habit, which ruin both body and mind, unfitting them for either business or society.

These are some of the sad and melancholy effects produced by early habits of youth, viz: Weakness of the Back and Limbs, Pains in the Head, Dimness of Sight, Loss of Muscular Power, Palpitation of the Heart, Dyspepsia, Norvous Irritability, Derangement of the Digestive Functions, General Debility, Symptoms of Consumption, &c., &c.

Mentally.—The fearful effects on the mind are much to be dreaded. Loss of Memory, Confusion of Ideas, Depression of Spirits, Evil Forebodings, Aversion of Society, Self Distrust, Love of Solitude, Timidity, &c., are some of the evils produced.

Weakness of the system, Nervous Debility and premature decay generally arise from the destructive habit of youth, that solitary practice so fatal to the healthful existence of man, and it is the young who are most apt to become its Victims, from an ignorance of the dangers to which they subject themselves. Parents and Guardians are often misled with respect to the cause or source of disease in their sons and wards. Alas! how often do they ascribe to other causes the wasting of the frame, Palpitation of the Heart, Dyspegsia, Indigestion, derangement of the Nervous System, Cough, and Symptoms of Consumption; also those serious Mental effects, such as loss of Memory, Depression of Spirits, or peculiar fits of Melancholy, when the truth is, they have been caused by indulging in Pernicious but alluring practices, destructive to both Body and Mind. Thus are swept from existence thousands who might have been of use to Society. NERVOUS DEBILITY.

their Country, a pleasure to their friends, and ornaments to Society.

DR. JOHNSTON'S INVIGORATING REMEDY FOR ORGANIC WEAKNESS.

This grand and important Remedy has restored strength and vigor to thousands of the most debilitated individuals, many who had lost all hopes, and been abandoned to die. By its complete invigoration of the Nervous System, the whole faculties become restored to their proper power and functions, and the fallem fabric of life is raisectup to beauty, consistency and duration, upon the ruins of an emaciated and premature decline, to sound and pristine health. Ob, how happy have hundreds of misguided youths been made, who have been suddenly restored to health from the devastations of those terrific maladies which result from indiscretion! Such persons, before contemplating

MARRIAGE,
should reflect that a sound mind and body are the most necessary requisites to promote connubial happiness, Indeed, without this, the journey through life becomes a weary pilgrimage; the prospect hourly darkens to the view; the mind becomes shadowed with despair, and filled with the melanchely reflection that the happiness of another becomes blighted with our own. Let no false delicacy prevent you, but apply immediately.

He who places himself under the care of Dr. Johnston

and with our own. Let no faise delicacy prevent you, but apply immediately.

He who places himself under the care of Dr. Johnston may religiously confide in his honor as a Gentleman, and confidently rely upon his skill as a Physician.

To STRANGERS.

The many thousands cured at this institution within the last ten years, and the numerous important Surgical Operations performed by Dr. J., witnessed by the Reporters of the papers and many other persons, notices of which have appeared again and again before the public, is a sufficient guaranty that the afflicted will find a skilful and honorable physician.

TAKE NOTICE.

It is with the greatest reluctance that Dr. Johnston pernits his card to appear before the public, deeming it unprocessional for a physician to advertise; but unless he did so,
he afflicted, especially strangers, could not fall to fall into
he hands of these imprudent hearting investors—idivid. the hands of those imprudent, boasting impostors—individ-uals destitute of knowledge, name, and character—pediars, shoemakers, mechanics, &c., advertising themselves as phy-sicians; ignorant quacks, who keep you trifling month after month, as long as possible, and in despair leave you with ruined health to sigh over your galling disappointment. It is this motive alone that induces Dr. J. to advertice, for healone can cure you. To those unacquainted with his reputation he deems it necessary to say, that his credentials or diplomas-always hang in his Office. Weakness of the Organs immediately cured, and full vigor restored.

## Protection from Lightning.

Protection from Lightning.

THE undersigned, being the duly appointed Agent of SPRATT'S ELECTRICAN AND ELECTRO-METALLURGIST LIGHT MING-ROD MANUFACTORY, COVINGTOR, Kentucky, begs to offer these superior Hods, of Spiral-twisted, Carbonized Annealed Iron, with Zinc Protectors, and Electro-positive elements combined in their manufacture; thus rendering them equal to copper as conductors. They are in ten-feet lengths, with accurately-fitted brass-screw, connecting joints, an entire new style of metallic (patented) stitachments, for brick or frame buildings; also, glass isolaters, of a nevel and ingenious construction, patented, forming a lock; the whole mounted with a solid platinum silver point, (patented,) twive inches long, surrounded at the base with three angular negative magnets, which possess the power, to an extraordinary extent, of discharging the opposite elements of the most fearful thunderstorm, and embrace the entire perfection of science up to the present time; the whole constituting the most magnificent and perfect silent conductor ever presented to the public.

Sofety has not been compromised by affording these excellent rods at such low rates; the greatest attention has been given to their construction, so as to be readily attached. The astonishing power of the negative magnets, in discharge, ing the air of its opposite elements, has been clearly demonstrated by the Electrometer, when unmagnetized points have shown but slight results, though placed under the same conditions. In fact, they gather and silently discharge electricity from the atmosphere when you would scarcely suspect any being present.

These improvements being secured by double letters patent, you are hereby cautioned against laying yourselves liable, by purchasing of those who are not authorised, or none.

CHARLES W. HEYDON, Washington City.

I do hereby certify that I have app lied various powerful chemical re-agents to Spratt's Patont Points for Lightning-Rods, and that the results of these experiments convince me that they will resist the action of atmospheric causes, and thereby preserve the extremity sharp—a condition most essential to protection against lightning. The re-agents used in the above experiments were a solution of chloride of sodium, (common salt,) acetic acid, sulphuric acid, and hydrochloric acid. With the first, there was no action on the metal; with the serval acids, there was very slight—a fact sufficient to show that atmospheric influences would have no sensible effect.

JOHN LECONTE, Prof. of Nat. Phil. et Chem. UNIVERSITY of Ga., October 8, 1850.

The Lightning Conductors of Mr. Spratt, offered to me.

The Lightning Conductors of Mr. Spratt, offered to me, re well calculated to perform the office for which they are stended. Yours, truly, Prof. ROBT. PETER. LEXINGTON, KY., February 20, 1850.

LEXINOTON, RV., February 20, 1880.

Chicago, September 3, 1880.

This may certify that I have examined, somewhat critically, James Spratt's Patent Lightning Rods, and that I am of opinion that it is constructed on scientific principles, For combining durability, cheapness, and efficacy, I deem it equal, and I think superior, to any other rod ever offered for my inspection.

for my inspection.

AUGUSTA, (GA.) November 11, 1850.

This will certify that I have examined the Lightning Rods, Metallic Points, and Isolating Attachments, manufactured by Mr. Spratt, and regard them as constructed in conformity to the general laws of the electric fluid; and the metallic compound constituting the Points, as promising, from the result of several tests to which they were submitted, to resist for years the action of those atmospheric causes most likely to corrode them.

Prof. Phys. Sc., Emory College, Ga., and Prof. Chem. and Pharm., Medical College, Ga.

The Lightning Conductors put up by Mr. Henry M. Smith.

The Lightning Conductors put up by Mr. Henry M. Smith, of this city, on the plan of Mr. Spratt, appear to me to be very well devised; and, in point of mechanical construction, very well devised; and, in point of mechanical construction, are the best 1 have ever seen.

It is to be hoped that the use of these Rods may become general, as an important auxiliary defence against a danger which must be regarded as of no ordinary magnitude, to which all buildings are liable.

R. SILIMAN, Jr.,
Prof. of Chem. in the University of Louisville.

## PROSPECTUS OF THE COTTON PLANT,

SOUTHERN JOURNAL, PUBLISHED WEEKLY, TO ADVOCATE DIRECT TRADE, MANUFACTURES, AGRICULTURE, AND THE DEVEL-OPMENT OF SOUTHERN RESOURCES, BY C. G. BAYLOR,

THE importance of such a journal as the above needs no exposition. The material and substantial interests of the South have been too long neglected. The "COTTON PLANT" is established to promote these interests, keeping entirely aloof from party of party politics. A complete for eign and domestic correspondence has been arranged. The eign and domestic correspondence has been arranged. The eign and domestic correspondence has been arranged. The best talent of the country will contribute to our columns, which will present a medium of general communication, cor-respondence, and information for the friends of the measures we advocate. The proper steps have been taken in Europe respondence, and information for the friends of the measureswe advocate. The proper steps have been taken in Europe
and America to lay the foundation of a direct foreign trade
at the South, and to introduce our coarse manufactures into
the continental European market. One object of the "CotTON PLANT" will be, as the organ of direct trade, to stimulate
the South to carry out this important measure.

We call upon the Southern merchauts generally to send
us their business cards, that we may lay them before the
country, to enable the friends of Southern commerce, manufactures, &c., to discriminate properly in their desire to promote Southern enterprise.

The importance of Washington City, as a point of location

The importance of Washington City, as a point of location for such a journal, especially in regard to opening foreign correspondence and promoting our foreign relations, is apparent. The opportunity of seeing here, also, members of Congress from every district of the country, presents means of general co-operation not to be found elsewhere.

To the Cotton, Sugar, Rice, and Tobacco Planters, we look confidently for support: and to the friends of "Direct Trade" throughout the South we say, "show your faith by your works."

The regular issue of the "COTTON PLANT" will commence your works."

The regular issue of the "COTTON PLANT" will commence in June next. Advertisements are particularly requested to be forwarded early. Business letters addressed to C. G. Baylon, Washington City, D. C.

## AMERICAN TELEGRAPH.

#### Sectional Parties.

The letter to which the following is a reply was published in the Republic of Wednesday We do no injustice to Mr. White in publishing the following, as it simply affords a satisfactory and most conclusive answer to the same suggestions as they have come up from a hundred

To the Editor of the Republic : Sin: In your paper of yesterday is an able, dignified, well-written letter from the pen of the Hon. Alexander White, of Alabama, urging a separate organization of the Union men of that State, irrespective of the Whig and Democratic parties. A prominent Union man himself, and an actor in the recent struggle between the *Union* and *Southern Rights* parties in Alabama, a greater weight will of course be given to the positions he assumes than if he were a mere speculator on

political economy.

Without doubting his patriotic motives, and cheerfully bearing witness to his candor and frankness, I desire, nevertheless, to controver some of his positions, and to call in question the fairness of some of his deductions.

The honorable gentleman's premises are, that both the Whig and Democratic parties are unsound upon the question of the Compromise, and hence the necessity of a third party to save the Union. To prove the correctness of this position, he has gone into an analysis of the vote of Congress in the passage of those measures, and the vote of Congress recently upon Mr. Jackson's resolution and Mr. Hillyer's amendment, as well as the votes in the Whig and Democratic cau-cuses. So far at least as the votes of Congress are concerned, in the passage of those measures and their late re-endorsement, I do not think the honorable gentleman is well sustained, as it was by the votes of Whigs and Democrats that those results were consummated. As to the vote in the Democratic caucus, refusing to recognise the Compromise as a finality, I have nothing to say; that is a matter that belongs peculiarly to the Democratic party, and I leave it in their own hands. But in regard to the vote in the late Whig caucus upon Mr. Marshall's resolution, I maintain that he has done great injustice to those who voted the resolution out of order. I will

quote his language : But in the late Whig caucus, met with a view to fixing the time and place of holding a Whig National Convention, the same resolution in effect offered by Mr. Marshall, of Kentucky, was ruled out of order by the Chair; and upon appeal taken from that decision, it (the decision) was sustained vote of 46 to 21-those sustaining the decision being by far the greater part Northern

Now, agreeable to his own statement, the caucus met to fix the time and place of holding the convention, and not for the purpose of making a platform for the Whig party, nor for any other purpose.

Therefore, the Chair decided rightly, and was sustained rightly by Southern men and by North-ern men, no matter in what proportion. If that caucus had entertained that resolution

it would have been an assumption of power which was never delegated to it, and would have been received with indignity by the Whig party every where. It is not fair to infer therefore that those who opposed that resolution are opposed to the Compromise; and the honorable gentle-man will see upon reflection that he has, unintentionally no doubt, done injustice, not only to Mr. Mangum, but to those who sustained his de

His effort to identify those who voted against Mr. Jackson's resolution and Mr. Hillyer's amendment with the "Southern Seceder and Northern Abolitionist"-common disturbers of the peace and conspirators against the liberties of the country-is almost equally disingenuous. He ascribes to them the language: "Though defeated, we are not subdued; and so soon as an oppor tunity presents itself, we will again attempt to destroy the constitution, and overturn the gov-erament under which we live." We submit it We submit if this is not pretty severe? But I will not complain of the severity if his construction is the proper one.

Let us see. Those resolutions were in the nature of a declaratory act in reaffirmance of the law. Before we condemn those who voted against them, let us inquire whether or not their passage was necessary. If the Compromise was not a finality before the passage of the resolutions, did they, by virtue of their passage, become so afterwards? If they were a finality before the passage of the resolutions, was there any necessity for agi tating the subject, and exciting the country, merely to minister to the ambition of demagogues and uselessly consume the time of Congress in still propositions can be answered affirmatively, were Whig members of Congress, who are in favor of the finality of the Compromise measures, under any obligation to gratify Mr. Jackson, who is a 'Southern Rights Democrat," and Mr. Hillver. who is a "Union Democrat," by supporting resolutions offered by them merely to manufacture Democratic capitol out of, and for no other purpose? I know of at least one Whig member ongress who opposed those resolutions on the ground that such action was uncalled for, and was nugatory in itself. It is quite reasonable to suppose that many others were actuated by similar motives, especially when we remember that those same men have never agitated either the repeal or modification of the Compromise in any of its parts, but express a willing acquiescence in all of the measures included in the series.

Having now, as I conceive, met the arguments of the honorable gentleman, I wish to suggest to him and to his constituents the impropriety of forming a sectional party for the purpose of erating upon the result of a Presidential election. The consequence rationally to be expected is the formation of an antagonistic sectional party, which must lead, sooner or later, to a dissolution of the Union. No matter by what names those parties may be known-Union or Disunion-the tendency will be the same. Geographical parties, if ever formed in this country, will be the certain augury of ruin. The "Father-of his Country" foresaw and warned his countrymen, in all coming time, to beware of this danger. Let not his teaching be in vain. The Whig party have now before the country three distinguished individuals whose names are spoken of in connexion with the Presidency. All of them are known to be Compre mise men, and men of undoubted firmness. of them are Americans, in the true sense of the term, and Union men.

The Union party in Alabama, Georgia, and Mis sissippi, it is admitted on all hands, is the Whig party. The gentleman bimself is a Whig. Now ask, in all candor, does he and the Union party wish to secede from the Whig party, and form sectional party, and finally secede from the Union Ponder these things well.

Dates have been received from Brownsville to he 28th ult. The greatest excitement prevailed at Rio

city in consequence of the murder of Wm. Patton, a respectable American merchant, by a band of Mexicans. A number of citizens pursued and overtook the murderers and lynched them, together with six others of an organized band formed for the robbing and murdering of Americans. The murderers professed to act under Gen. Canales, and said that Canales intends to capture Brownsville. The settlers on the American side of the river are preparing for the attack.

A remarkable statement appears in the London imes respecting the course to be pursued by Austria, Prussia, and Russia, in the event of Louis Napoleon assuming the title of Emperor. The substance of it is, that Prince Schwarzenberg had addressed a circular to the European courts, expressing his conviction that Napoleon was about o erect an imperial throne, adding that Austria felt no alarm, and advocating the claims of Namore useless discussion? If neither of the above poleon to the friendship and alliance of their respective governments. Prussia answered this ircular on the 18th, and Russia on the 29th of February, and the tenor of both replies is, that the two powers looked upon the design neither with favor nor hostility; that they believed he was disposed to follow the foreign policy of his uncle, and was now aiming to powers, in order to profit hereafter by that separation, but that the three powers, by acting in concert, could keep him in check. Russia and Prussia, however, would recognise him as Emperor if elected to that office, but merely as an

elected monarch, and not as the founder of Napoleon dynasty.
